why us

- We've been advising customers on, deploying and supporting Cisco UC deployments for 15 years.
- Those customers range from 5 user to >5000 user global corporations across Finance, Manufacturing, Education, Government, Professional Services and other verticals.
- We're driven by customer satisfaction not by sales targets.
- We deploy and support Cisco UC for other Cisco partners.
- We build long term relationships – the TA stands for Trusted Advisor and that is what we become for customers.
- We have solid Cisco relationships and can engage your Cisco representative to vouch for our capabilities.
- We have lots of happy customers who value our honest, no nonsense approach to business.
- We can provide a full solution – telco circuits, DDI and WAN migrations, SIP trunks, Contact Centres, and resilient solutions.
- If a solution isn't actually right for a customer, we aren't afraid to tell them.

why cisco

- Cisco is the only company that can provide a complete, end to end, Unified Communications solution – a whole offer – that includes technology, support and financing.
- Cisco has millions of business customers and a solid reputation as a market leader.
- Cisco offers businesses the largest breadth and depth of products and solutions that address unique business challenges; sold and delivered how you want them and wherever you are.
- Cisco's brand and years of experience in UC offer small businesses peace of mind.
- Cisco offer 0% financing to remove barriers to investing in the technology you need.

the marketing bit

Unified Communications can be defined as the integration of real-time communications services. In the broadest sense, Unified Communications is the integration of your voice and data network. It might start with the simple integration of your email with your voicemail into a single messaging inbox. However, it can become far more complex, with presence and instant messaging technologies, contact centre, video, web conferencing and collaboration applications all tying employees together.

Or you can have a solution that is somewhere in between—one that is tailored specifically to the needs of your business. Using our extensive experience of Cisco Unified Communications TA Networks will help you decide and implement the best solution for your business

the benefits

- Reduced travel costs with remote teleworker and mobility solutions
- Reduced costs for cabling and moves, adds, and changes
- Lower telecommunications costs with local and long distance via SIP trunking
- Video on your phone and on Cisco WebEx® for more personal interactions
- Features such as single-number reach and extension mobility, enabling customers and suppliers to reach you on any device, no matter where you are.
- Integrated messaging, with voicemail delivered to your email inbox for greater productivity
- Presence features, so that you can see who is available and how to reach them, helping your business be more responsive and serve customers faster
- Integration with customer relationship management (CRM) applications, for customer information when you need it and click-to-dial capabilities
- A consistent user experience, regardless of device or media type and location

TA Networks Cisco Unified Communications solutions are delivered using Cisco BE6000 - a family of all-in-one collaboration solutions that are right-sized and affordable for companies ranging from 10 up to 1000 employees. A single platform gives you premium voice, video, messaging, instant messaging and presence, conferencing, and mobility capabilities. And that's not all. You also get a wide choice of advanced collaboration options, including video conferencing and contact centre services, in the same solution that's designed to grow with your needs.
